ATL ARCHITECTS

ABOUT US

ATL Architects is a Full Service Professional Consulting Agency operating since 2013 in Lahore, Pakistan. Comprising of a team of reputed Architects, Engineers & Interior Designers. The firm enjoys a reputation for architecture and design solutions that are responsive, committed and comprehensive, and most importantly, varied and proactive. The key understanding is that every job is unique in size, budget and requirements and hence requires individual treatment. This is reflected in the firm's creative ability and technical expertise from concept to construction of each project.

We believe in the power of design to elevate people's lives and we are committed to doing everything necessary to deliver environments that outperform our clients' expectations, now and in the future.

SERVICES

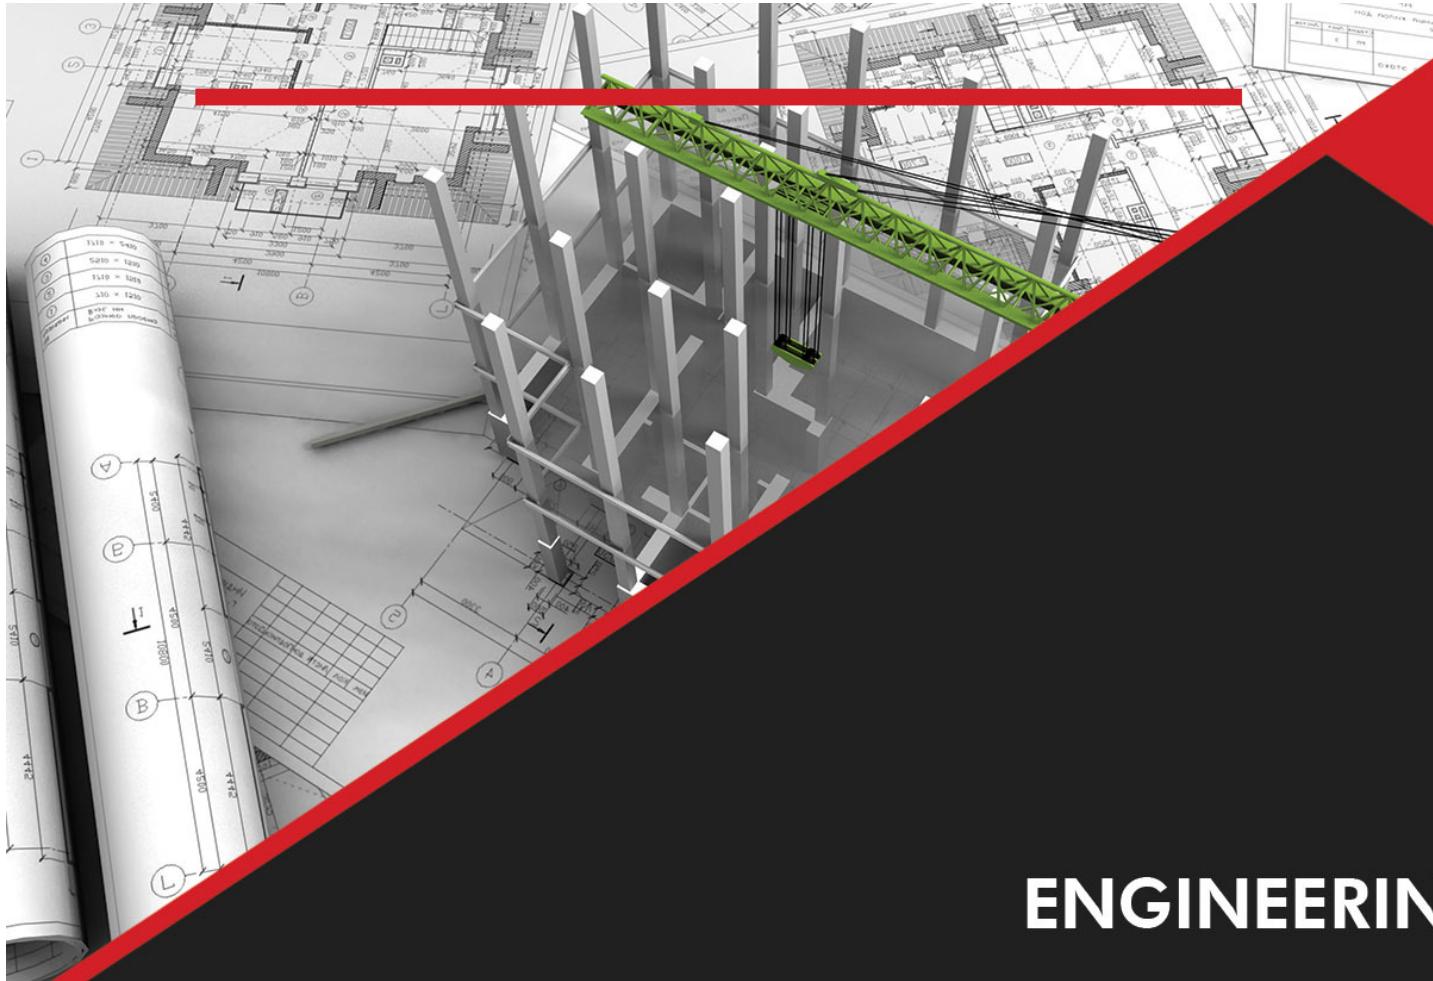

At our soul and in our daily practice, we are a service company. Our vast suite of capabilities allows us to intersect with one another, involve experts at every level, include our clients' visions and improve each project we touch. A place is not merely a structure. It is a living, breathing element that resides in a larger environment, and must exist in a community and improve the experience of those who use it – as well as those who never will. Below is a brief description of our services.

ARCHITECTURE SERVICES:

The heart and soul of what we provide. Our comprehensive architectural services include conceptual and schematic design, design development and construction documentation. Architecture embodies all we touch. And we are a combination of artists and tacticians, imagining, coordinating and creating some of the best architectural projects. We combine global reach with a tremendous local touch. Our commitment to our communities allows us to effectively navigate local regulatory approval processes. We also handle issues of site analysis, access, circulation, parking, urban design and local development guidelines. It's the entire picture. Always

ENGINEERING SERVICES

At ATL we believe that high-quality engineering should pinpoint not just what needs to be done, but how it should be done. Whether mechanical, electrical, or structural, we employ the very best professional engineers in their fields. We stretch the design boundaries daily, but always with a practical guide. Our highly experienced in-house team of structural engineers consistently communicates with the architectural team to ensure structural considerations are incorporated into designs from day one.
